Aquastore wastewater tank

Engineer

Stantec Consulting Ltd.

Testimonials

Perry Rose, Senior Technologist
with the City of London

“The tanks have certainly met our need for sludge storage. The success of the first tank convinced us and Stantec Consulting Limited to specify another Aquastore tank when it came time to replacing an older tank located on the site. The site is part of a sludge receiving station that sees constant truck traffic. Greatario was able to construct the new tank with a minimum of disruption to our daily operation. We are certainly pleased with the functionality of the tank and the professional manner in which it was constructed.”
